

Mobile Kitchen Trailers General Information

<http://www.silverstarmetal.com>

Silver Star Metal Fabricating has been manufacturing premium quality mobile kitchens since 1984. We have built hundreds of mobile kitchens that are still in use across North America. All the mobile kitchens are custom designed by either our customer or our design team.

Every new mobile kitchen is discussed in detail with our customer. We ensure our customer is fully in control of the final product. With concept and layout drawings we ensure that our customer can visualize what the final product will look like. Throughout the years we have manufactured mobile kitchens small and large ranging from 10ft all the way to 34ft. The trailers and trucks are typically supplied by our customer with our advice and guidance. The interior equipment can be supplied by Silver Star Metal as well or the customer

can look into and purchase their own. We only recommend commercial heavy duty kitchen equipment.

At Silver Star Metal Fabricating we want our customers to be happy with our final product. After being in the business for over 25 years we are extremely pleased when customers return to purchase another mobile food vending product.

Why purchase a mobile kitchen from Silver Star Metal Fabricating Inc.?

As a mobile food equipment manufacturer for over 25 years we have the knowledge and experience to build a quality mobile kitchen that lasts for years to come. Other mobile kitchen manufacturers simply install purchased stainless steel food equipment such as sinks, countertops, cabinets, exhaust hoods, coolers, and shelving. Silver Star Metal Fabricating Inc. manufactures the sinks, countertops, cabinets, exhaust hoods, coolers, and shelving in house which allows the interior to be completely customized. The seamless stainless steel interior is unlike any other since all the stainless steel equipment we manufactured is a perfect fit for only your mobile kitchen.

As an experienced manufacturer we know what type of equipment a successful business requires. We use top grade commercial equipment and ensure that gas and electric equipment are installed properly. Other manufacturers with their limited experience may select and install an inadequate generator for your power needs, this will surely cause problems for a successful business. Our staff are highly skilled in electrical and gas connectivity which will ensure your mobile kitchen functions as its intended.
